### **KAI SENSORS TO TEAM WITH SAIC**

HONOLULU, HAWAII, January 9, 2009 -- Kai Sensors, Inc., an award-winning developer of non-contact vital signs monitoring products, has announced it will team with Science Applications International Corporation (SAIC) (NYSE: SAI) to pursue opportunities for bringing Kai Sensors non-contact vital signs monitoring products to market. The two companies plan to work together to develop various applications for intelligence gathering, border security, law enforcement missions, and monitoring of U.S. troops on the front line.

“We feel there is promising potential for our products in national security applications, and SAIC, with their extensive experience, resources and expertise in this field is an ideal teammate for us,” said Andrea Yuen, Chief Executive Officer. “We look forward to working with SAIC in commercializing products that will enhance national security and improve quality of life.”

The companies plan to pursue opportunities together starting in February 2009.

#### **About Kai Sensors, Inc.**

Headquartered in Honolulu, Hawaii, Kai Sensors, Inc. develops products designed to measure and monitor vital signs wirelessly, with no contact, and from a distance. Kai Sensors’ products will be used in medical, national security and other markets.

Kai Sensors received the 2008 Frost & Sullivan Technology Innovation of the Year Award, and is working with leading companies to commercialize its non-contact monitoring products. For more information, see [www.KaiSensors.com](http://www.KaiSensors.com)
