KAI MEDICAL ANNOUNCES CE MARK CLEARANCE TO SELL ITS LATEST TWO PRODUCTS IN EUROPE

HONOLULU, HAWAII, August 1, 2011 –Kai Medical, an award-winning developer of non-contact vital signs measurement and monitoring products using Doppler radar, has announced that the company has received the CE mark for its latest two products, the Kai Spot 2.1 and Kai Continuous 1.0 clearing the way for sales into Europe and other countries that recognize the CE mark.

“This marks the beginning of the company’s sales push into foreign markets. The CE mark is accepted as the seal of approval for marketing our devices anywhere in the EU and other countries that recognize the CE mark. It also means our products have held up to numerous tests and international standards. This is a big step forward for Kai,” said Bob Nakata, CEO and President.

About the Products

The Kai Spot 2.1 and the Kai Continuous 1.0 are fully functional respiration monitoring products. The Kai Spot provides point-in-time respiratory measurements, while the Kai Continuous offers continuous measurement, monitoring and recording of respiratory data. Both products use proprietary algorithms paired with Doppler radar technology to measure respiratory rate and activity. Kai Spot 2.1 and the Kai Continuous 1.0 are pending FDA 510(k) approval. Kai Medical is currently introducing both products to potential distributors in the EU and Asia. Kai Spot 1.0 and Kai Spot 2.0 are cleared for sale in the US.

About Kai Medical, Inc.

Headquartered in Honolulu, Hawaii, Kai Medical develops medical devices designed to measure and monitor vital signs via radar, with no contact and from a distance. The team comprises leading technical experts, new product commercialization experts, and world class advisors. For more information, see www.kaimedical.com.
