KAI MEDICAL PARTICIPATES IN WORLD CLASS TRADE SHOWS

HONOLULU, HAWAII, November 2, 2011 – Kai Medical, an award-winning developer focused on improving the quality of life of its users through its wireless, non-contact respiration sensing technology product line, and sleep apnea diagnosing and treatment technology product line, has announced that the company will be participating in the following series of world class conferences and trade shows:

- CHEST 2011, recognized as a world class event in clinical chest medicine, was held in Honolulu, Hawaii from October 24 – 26, 2011. This event featured educational programs in pulmonary care, critical care, and sleep medicine and was attended by physicians from the United States and abroad specializing in respiratory care.
- Asia-Pacific Economic Cooperation, or APEC, is the premier Asia-Pacific economic forum with a mission to support sustainable growth and prosperity in the Asia-Pacific region by, among other things, promoting free and open trade and encouraging economic and technological cooperation. The exclusive invitation only event will be held in Honolulu, Hawaii from November 7 – 12, 2011 and includes APEC country leaders such as President Barack Obama of the US, President Hu Jintao of China, and Russian President Dmitry Medvedev. Kai Medical is honored to have been one of the few companies from the State of Hawaii selected to participate in promoting our company along with the few selected mainland United States companies at the CEO Summit.
- MEDICA 2011 is recognized as the world's largest medical device convention and will be held in Dusseldorf, Germany from November 16 – 19, 2011. The event will feature over 137,000 visitors from around the world attempting to gain a personal overview of the latest developments in their professional field of activity. Kai Medical is excited to be a part of MEDICA and display its latest two products, the Kai Spot (v 2.1) and Kai Continuous (v 1.0) and the breakthrough technology of its wireless, non-contact vital signs measurement and monitoring products.
